4th World Congress rapidly approaching!

Newsletter by: Julie Gehl, Zealand University Hospital, Denmark
kgeh@regionsjaelland.dk

After three very successful world congresses we are now ready to open the doors for the 4th World Congress. The venue is in the center of Copenhagen and the dates are from October 9th to 13th, 2022. Check all details via the website of the 4th World Congress, available at <https://wc2022.electroporation.net>.

The scientific program will be released in full this week and covers over 300 presentations, which will be held either as plenary talks, oral presentations in scientific sessions, or posters. The venue at Tivoli congress center features four large meeting rooms centered around a foyer area where lunch, and coffee/tea will be served. This will facilitate great opportunities for networking.

New this year is an Educational Session on October 9th, serving as a broad introduction to the field across basic science and the many applications of pulsed electric fields.

The welcome reception will actually be on boats; after the educational session, everyone is invited to walk a few meters from the congress venue to the harbor side where cruise boats will take us on a tour of the Copenhagen harbor.

Monday October 10th, we'll be on for the main congress! Exiting plenary talks will give important perspectives on the field, from basic science and new equipment to vaccine development, cardiology, veterinary use of electroporation, new developments in oncology and immunooncology.

An organization of the congress has been made, which focusses topics on food technology and environmental purposes mainly in the beginning of the congress, cardiology and veterinary indications in the mid portion and oncology (both reversible and irreversible electroporation) mainly in the last part of the congress. Several sessions on basic science, modeling and equipment development are placed across the entire congress program. Posters will be visible throughout the congress, in the main hall.

Time to mention the Congress dinner! This will be held in the Tivoli castle, serviced by the renowned Nimb Restaurant. And we managed to secure a live band, so bring your dancing shoes!

We would like to thank the sponsors, including sponsors of 37 travel grants for students and early-stage career scientists, for laying the important foundation for the congress. Not least, thank you to abstract submitters; The quality and scope of abstracts really show that progress in the field is taking place across the board, and things are moving fast.

To the many who have already registered; Check the website for program and updates, can't wait to see you all in October!

To those who did not yet register: Registration is open anytime – but the rate is lower if you register before September 5th! To register, visit the Registration page of the World Congress website, available at <https://wc2022.electroporation.net/registration>.

The Welcome reception on October 9th will be a cruise of the Copenhagen harbor.

Forthcoming events

4th World Congress on Electroporation and Pulsed Electric Fields in Biology, Medicine, and Food & Environmental Technologies

Copenhagen, October 9 – 13, 2022

<https://wc2022.electroporation.net>

16th interdisciplinary postgraduate course and international workshop Electroporation Based Technologies and Treatments (EBTT)

Ljubljana, November 13 – 19, 2022

<http://www.ebtt.org>

Society Council Members (cont.)

Eugène Vorobiev, France
Officer: Environment Applications

Giovanna Ferrari &
Matej Kranjc
Officer: At Large
